

wiretracks™

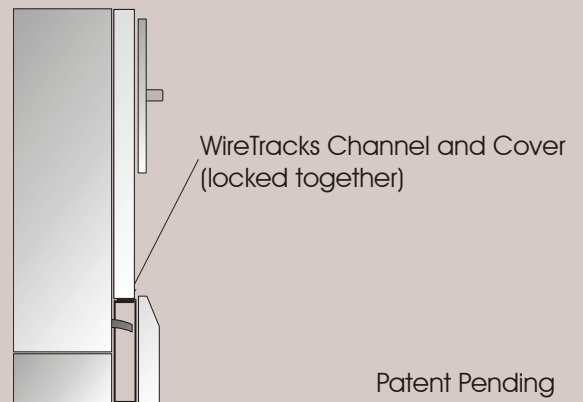

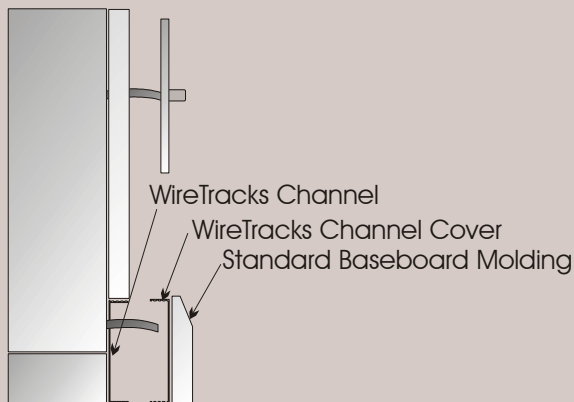

your home will never be obsolete again

Now you can install a home theater without running wires across the floor, have sophisticated computer networks in your home or business, put your telephones where you want, add an effective alarm system, upgrade to new smart house technologies, or install cable or satellite television—**EASILY!**

WireTracks is a wiring channel system that protects your home against obsolescence. Most structured wiring solutions commit you to one or two types of wiring. **WireTracks** is a **Structured Channel™** system that enables you to add new wiring invisibly. So, it doesn't matter what kind of wiring you have now because you will always be able to upgrade it or add new technologies in the future!

WireTracks consists of an interlocking wiring channel and cover that replaces part of a building's wallboard and sits between the studs and the baseboard molding. The channel attaches directly to the studs and includes cable clips to hold the wiring in place. The channel cover attaches to the baseboard molding and they become an integrated unit that can be removed and reattached any time new wiring is needed.

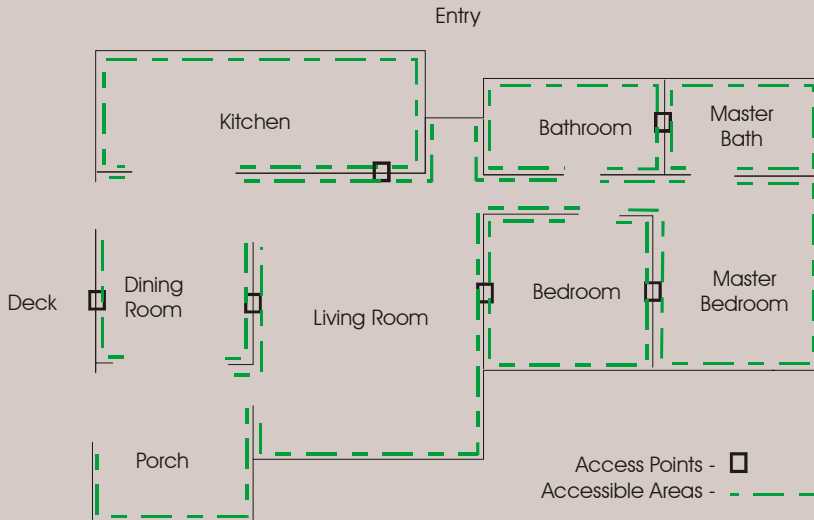

Patent Pending

Dealer inquiries are welcome.

structured channel™ solutions

The **WireTracks** wire channel system is excellent for both retrofit and new construction. In new applications, **WireTracks** enables homeowners to upgrade their wiring at any time in the future without having to tear apart walls and enables them to add new outlets to any location with a minimal number of access points.

In retrofit applications, homeowners can get almost as much coverage without a central wiring closet.

specifications

Material

- UL 94 Rated PVC

Dimensions

- Height - 2 1/2"
- Depth - Adjustable 1/2" to 3/4"
- Length - Available in 5' and 8' lengths

Supported Wiring

- Class 2 Data Cables

applications

Applications for WireTracks include:

- Home Theater and Stereo
- Computer Networking and Telephones
- Alarm Systems
- Cable Television
- Smart House Technologies
- Surveillance
- Intercom Systems
- Music Equipment
- Other Specialty Wiring
