

wiretracks®

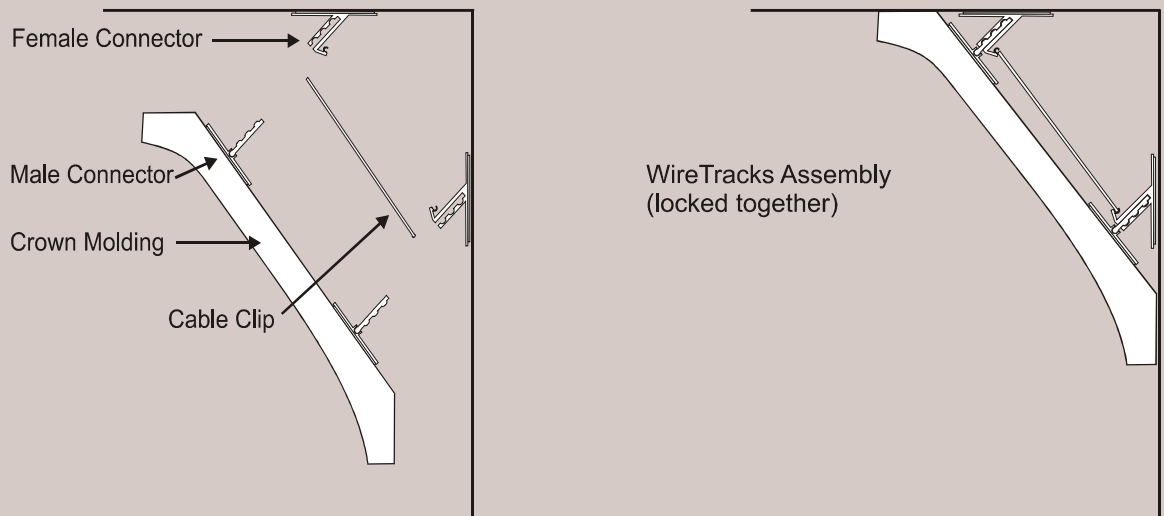

your home will never be obsolete again

With WireTracks products, every piece of baseboard molding, chair rail molding, and door casing in your house or office can conceal a wiring raceway that you can use to add new technologies at any time in the future.

WireTracks CM continues this vision by turning standard crown molding into a removable wiring raceway. Once installed, you will be able to install a home theater without running wires across the floor, have sophisticated computer networks in your home or business, locate telephones anywhere, add an effective alarm system, upgrade to new smart house technologies, or install cable or satellite television—**EASILY!**

WireTracks CM consists of interlocking brackets that attach to your crown molding and your wall. The female connectors attach directly to the wall and include cable clips to hold the wiring in place. The male connectors attach to the crown molding which enables you to remove and reattach the crown molding any time new wiring is needed.

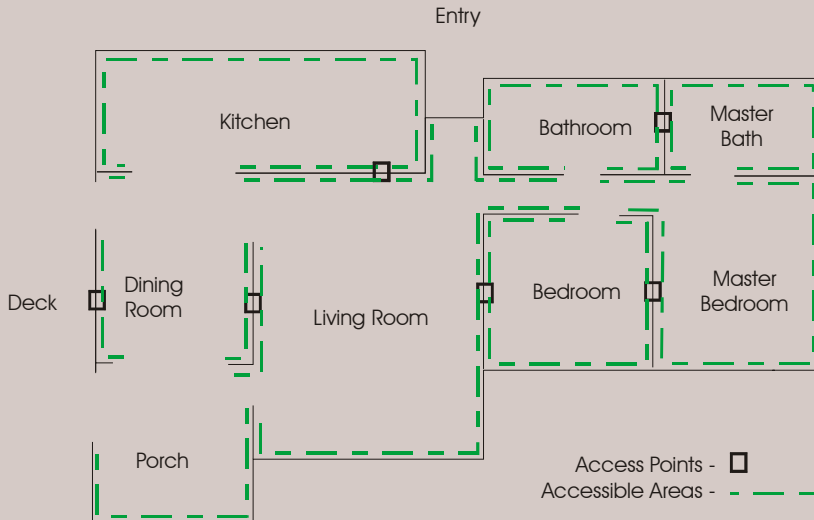

For more information, visit the WireTracks website at www.wiretracks.com.

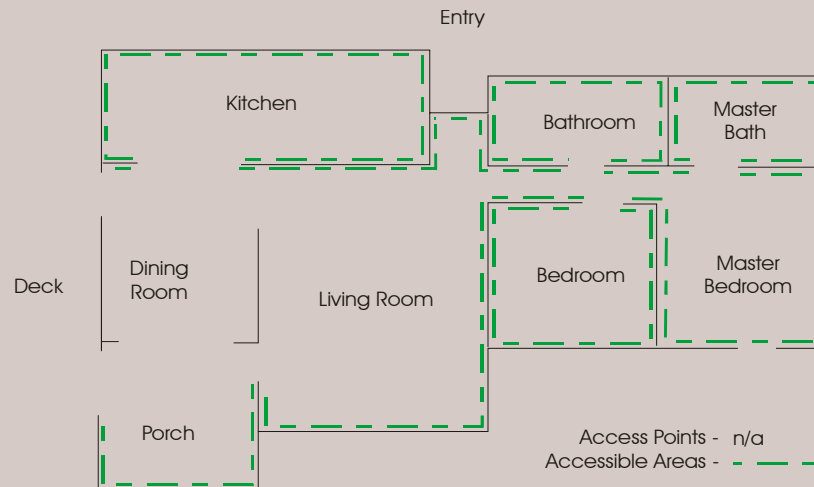

Dealer inquiries are welcome.

structured channel™ solutions

The **WireTracks CM** wire channel system is excellent for both retrofit and new construction. In new applications, **WireTracks** enables you to upgrade your wiring at any time in the future without having to tear apart walls and enables you to add new outlets to any location with a minimal number of access points.

In retrofit applications, you can get almost as much coverage without a central wiring location.

applications

- Electrical Rewiring (wallboard or plaster)
- Home Theater and Stereo
- Computer Networking and Telephones
- Alarm Systems
- Cable Television
- Smart House Technologies
- Surveillance
- Intercom Systems
- Music Equipment
- Other Specialty Wiring

features

- Add new wiring without major renovation
